

SPECIALISTS IN BIOENGINEERING

ENVIRONMENT & LANDSCAPE SOLUTIONS

**PROTECTION,
REHABILITATION &
CREATION OF
NATURAL AREAS**

Since its creation, Gregori International has dedicated itself to the construction and management of nurseries. With landscaping projects all around the world, the company has been expanding its expertise in plant engineering across a wide range of climates, including Mediterranean, equatorial, continental, tropical, sub-Saharan, and more. This expansion encompasses the cultivation of various plant types, flowers, fruits, vegetables, trees, shrubs, grasses, and beyond.

With a 50-year history in business, Gregori International leverages its extensive expertise across various fields to provide environmental solutions that prioritize the enduring protection of ecological characteristics and the conservation of biodiversity in landscaping projects and natural environments, with a primary focus on addressing climate change challenges.

Gregori International offers this expertise to its clients, delivering tailored solutions that assist them in addressing environmental issues and realizing their aspirations for green spaces with utmost efficiency.

OUR STRENGTHS

Our presence - Our teams
Our equipment - Our mobility

Head Office - France

Miami Office - Florida

TEAMS AND OFFICES WORLDWIDE

- We are based in Europe, the USA and Africa.
- Our office locations are strategically aligned with our business operations.
- More than 200 employees available and ready to operate on site in record time.

A COMPLETE FLEET OF MODERN EQUIPMENT

- We can promptly provide well-maintained, suitable equipment.
- We can meet the shortest deadlines.
- Our equipment is regularly serviced by our maintenance teams.

LOGISTICS PERFECTLY EXECUTED

- Our divisions located at our central office in France, Miami, and at each African branch efficiently oversee equipment transportation at a local level, ensuring effective site supply.

PRELIMINARY EVALUATION AND FEASIBILITY STUDIES

- Analysis of site constraints
- Environmental and social impact studies
- Recommendations regarding design orientation

EXECUTION OF PROJECT WORK, COMPREHENSIVE TURNKEY IMPLEMENTATION

- Purchasing and shipping of materials
- Full implementation
- Quality control and safety insurance
- Project Delivery
- Maintenance

DESIGN AND TECHNICAL STUDIES

- Pre-project detailed engineering studies
- Drawings and performance schedule
- Preparation and submission of all technical documents

PROJECT FINANCING SOLUTIONS

- Facilitating connection with public and private financing institutions
- Preparation and follow-up of loan and financing applications

DESIGN CONSTRUCTION RENOVATION

**A COMPANY COMMITTED
TO CONTINUOUS
IMPROVEMENT FOR
MORE THAN 50 YEARS**

PLANT NURSERIES

LARGE-SCALE PLANT PRODUCTION

Akouedo - Ivory Coast

Installation, development and management of project nurseries

- Fast implementation in the early stages of the project
- A design to meet all the project's plant requirements
- Selection of plant species which are best suited to the natural environment
- Continuous multiplication and production
- Supply and assembly of structures and irrigation systems at the nursery.

Gregori International Nursery - Saint-Jory - France

ADVANTAGES

Gregori International

Supply management:

- time,
- quality,
- quantity and cost

A sustainable approach which minimises transport requirements.

AKOUEDO NURSERY

10 hectares

350,000 plants

Nursery at the Moorea Green Pearl Golf Course
French Polynesia

Akouedo nursery - Ivory Coast

REVEGETATION OF DEGRADED SOILS

Akouedo – Ivory Coast

Rehabilitation of landfill sites Planting of eroded soils or mining sites Reforestation - Replanting

Securing the site

- Waste stabilisation
- Sealing of the polluted soil using a geomembrane and geo-drainage networks
- Installation of gas and leachate collection networks

Replanting

- Laying of topsoil layers
- Planting and landscaping of spaces
- Creation of recreational areas and green spaces

Akouedo landfill – Ivory Coast

Gas recovery network – Akouedo – Ivory Coast

Replanting of the Akouedo landfill – Ivory Coast

ADVANTAGES *Gregori International*

Technical support in improving quality of people's life:

- In **sanitary terms** – ensuring the area's safety
- In terms of **social impact** – restoration of spaces that become attractive again.

A tree being transplanted

MANAGEMENT OF NATURAL SPACES

Wetlands, Rwanda

Rehabilitation of wetlands Erosion control Water management and drainage

Thanks to its many years of experience, Gregori International specializes in the design and implementation of works and technologies helping to protect, manage, restore, or rejuvenate natural spaces.

Technology at the service of a stable and natural environment

- **Soil:** erosion control, stabilisation with riprap, rock bulkheading and soil anchorage systems, hydroseeding, etc.
- **Water:** Construction of Stormwater Drainage structures, water retention ponds & reservoir used either for discharge or storage (irrigation) according to water requirements.

ADVANTAGES *Gregori International*

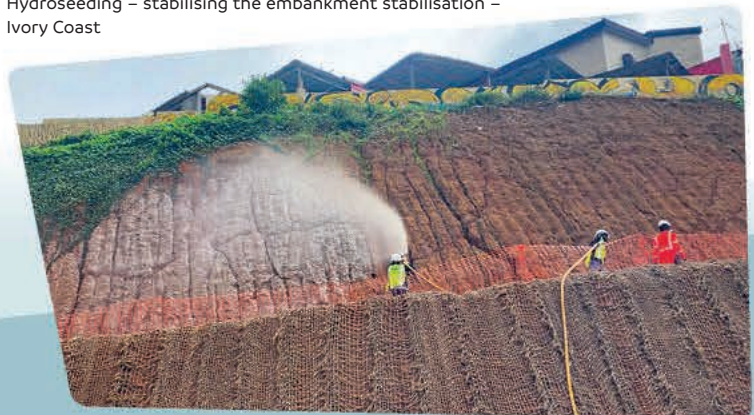

A wealth of experience of working in wet environments

- preserving the ecologic continuity
- enabling the development of biodiversity

Hydraulic works for storm water management
Kigali Golf Course – Rwanda

Hydroseeding – stabilising the embankment stabilisation –
Ivory Coast

CREATION OF EXCEPTIONAL LANDSCAPES

Ocean Cay, Bahamas

Creating plant-based architecture

Gregori International specializes in **exceptional landscaping projects**: prestigious green spaces, infrastructure and external works meeting the needs of demanding clients of institutional, luxury and tourism sectors... delivering a pristine visual aspect in areas where sometimes climatic conditions can be extreme.

- Design – Engineering
- Excavation works and civil engineering
- Landscaping
- Masonry works: fountains, paved walkways
- Roads and lighting
- Maintenance

Emirate Hills,
Luxury villa - U.A.E.

ADVANTAGES *Gregori International*

- Prestigious projects across all continents
- Proven reliability in terms of quality of workmanship and meeting project deadlines

Landscaping - Nevis Four Seasons - the West Indies

Paving stones being laid to make a pathway - Ocean Cay - Bahamas

PORTFOLIO LANDSCAPING

EXPERT IN ENVIRONMENTAL
ECOLOGICAL SOLUTIONS

Hydraulic works – Tangier – Morocco

Planting – Ocean Cay Island – Bahamas

Highways and external works – Jacksonville – USA

Masonry works – Golf course pathway – Morocco

Excavation works – Abidjan – Ivory Coast

Erosion control – Moorea – French Polynesia
